

New Jersey's "Do Not Call List" is a strict one. This is a reflection of the NJ public's desire to preserve the private nature of its home places. Please, assist our state's initiatives in seeking to provide protection against the intrusive nature that can develop from misuse or overzealous deployment of modern communications meant to provide facilitative, meaningful networking, not privacy abuses.

Thank you very much for the opportunity to comment on this important issue.

Florence McGinn, Hunterdon County, NJ
